EDUCATION

University of California, San Diego

June 2026

B.S. Data Science | GPA: 3.5

San Diego, CA

Relevant Coursework: Data Structures & Algorithms, Statistical Methods, Machine Learning, Data Visualization, Database Systems, Predictive Analytics, Data Mining, Probability & Statistics, Linear Algebra, Data Management, Artificial Intelligence

TECHNICAL SKILLS

Programming & Databases: Python, SQL, R, C++, JavaScript, HTML/CSS, MySQL, BigQuery, DuckDB

Machine Learning & Analytics: Scikit-learn, Gradient Boosting, Logistic Regression, Regression Analysis, Feature Engineering, Model Evaluation, ROC-AUC, Precision-Recall, Permutation Importance, Statistical Analysis

Data Engineering: ETL, Data Pipelines, Dagster, Data Warehousing, Medallion Architecture (Bronze/Silver/Gold), API Integration, Data Quality Checks

Tools & Visualization: Power BI, Tableau, Streamlit, Pandas, NumPy, Excel, Git, Claude Code, Codex, KPI Reporting

EXPERIENCE

HorizonX

San Diego, CA

Powered Sales Automation & Strategy Extern

Jan 2025 - Jun 2025

- Analyzed 5+ AI automation tools, improving evaluation efficiency 25% through Excel, Tableau, KPI reporting, and benchmarking.
- Increased projected outreach response rates 18% by auditing 10+ workflows through audience segmentation, conversion funnel analysis, and dashboard-driven diagnostics.
- Created stakeholder reports, delivering 3 recommendations through business intelligence summaries, onboarding materials, and presentations.

Fazz Financial

San Jose, CA

Data Analyst Intern

Jul 2024 - Sep 2024

- Improved SLA performance 4%, analyzing transaction datasets through Excel, Power BI, KPI tracking, and root-cause analysis.
- Reduced reporting inconsistencies 20%, validating 5,000+ customer records through ETL, cleaning, and quality checks.
- Produced recurring dashboards, accelerating manual reporting 15% through Power BI summaries and stakeholder presentations.

De Anza College

Cupertino, CA

Laboratory Assistant

Jan 2024 - Mar 2024

- Built operational trackers, improving communication efficiency 15% through Excel, R, and structured workflow analysis.
- Lowered cafeteria costs 2%, identifying supply patterns through spreadsheet analysis, reporting, and visualization.
- Organized daily records, reducing task delays 10% through documentation, process tracking, and resource coordination.

TECHNICAL PROJECTS

NBA Player Load & Injury-Risk Intelligence Platform

- Architected end-to-end Python ETL pipeline ingesting 105K+ player-game records across 30 NBA teams and 4 seasons into a bronze/silver/gold DuckDB warehouse.
- Achieved 0.70 ROC-AUC and 2.6x precision-recall lift over base rate by training a gradient-boosting absence-risk classifier on a time-based train/test split in scikit-learn.
- Translated model predictions into a real-time decision tool by deploying an interactive Streamlit Cloud dashboard with cascading season/team/player filters and an ML risk board.

NVIDIA Stock Market & Macroeconomic Regression Analysis

- Modeled financial market drivers, explaining 54.4% variation through Python regression, SQL queries, and statistical analysis.
- Joined 6+ years of records, preparing analytics-ready data through cleaning, integration, and time-series transformation.
- Identified 1.359 S&P relationship increase, presenting business trends through structured analysis and executive-style summaries.

AI Infrastructure & Carbon Emissions Data Analysis Project

- Standardized 29,000+ records, improving AI-readiness through Python, Pandas, ETL, validation, and data quality workflows.
- Developed statistical models, evaluating AI infrastructure relationships through regression analysis, heatmaps, and exploratory research.
- Communicated 0.65 correlation signals, translating complex findings through feature engineering, visual summaries, and data storytelling.
